REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior art of record, because none of the references in alone or in combination discloses a (polarization) beam combiner/splitter apparatus; or a method of combining a plurality; or a method of separating a plurality of dual-polarized combined beams of light, wherein the apparatus comprising:

- a first array of optical fiber pairs;
- a second array of optical fibers; and
- an optical core interposed between the first and second arrays, wherein

the optical core is configured to combine a plurality of pairs of orthogonally polarized beams of light into a plurality of dual-polarized combined beams of light, and wherein the optical core is configured to separate a plurality of dual-polarized combined beams into a plurality of pairs of orthogonally polarized beams.

The underlined limitations are critically, since the device and the method are significant improved: increasing the strength of an optical signal to enable its transmission over large distances; minimizing the amount of space occupied by components located within optical devices; and reducing the complexity of optical devices.

The Nikolov et al. (6,876,784 B2) reference is closest reference, disclose an optical polarization beam combiner/splitter wherein the optical core interposed

between input/output optical fiber comprising a thin film wire-grid interposed between collimating/focusing lenses, the device more complexity and more space for components.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
